NEURONODE® Duo

NEURONODE DUO®

ACCESS FULL POTENTIAL

The NeuroNode Duo® is a speech generating device with powerful access methods that make the user more effective in communicating. The NeuroNode® sensor allows full use of the communication software with the slightest movement.

Available in Windows® and iOS®

POWERFUL DEVICE
Established, trusted equipment to efficiently run the system.

EMG MODE
The slightest movement can activate the sensor.

SPATIAL MODE
A sensor that moves with the user to turn movement into selection.

COMMUNICATION SOFTWARE
Gives the user tools to express themselves and communicate independently.

FUNDING OPTIONS
Get the device your client needs, fully funded. We're a registered NDIS provider.

24/7 SUPPORT
You and your clients will always have a resource to help with the device.

Control Bionics offers a suite of dedicated speech generating devices and accessories to give people living with complex communication and physical needs their voice.

Our product range is more intuitive and flexible than ever.

POWERFUL ACCESS METHOD

The NeuroNode Duo® features the NeuroNode®, a switch which offers the combined power of EMG and 3D spatial control. The NeuroNode® is flexible and doesn't require specific body position or lighting conditions.

It allows users to choose muscle control or movement control to operate the NeuroNode Duo® all in one small, wearable device.

With EMG (electromyography) and spatial control options, the NeuroNode Duo® gives the user communication possibilities they've never had before.

The wireless switch moves with the user, allowing flexible placement for even the most minimal movement can trigger the switch, giving the user control and independence.

I ♥ ndis REGISTERED NDIS PROVIDER

STANDARD CONFIGURATION

The NeuroNode Duo® is offered with a Windows®-based Surface Pro tablet and a Control Bionics NeuroNode®. This powerful combination is our standard device model and highly recommended.

OTHER CONFIGURATIONS

The NeuroNode Duo® is available using an Apple® iPad tablet with the same NeuroNode® technology. Combining the flexible NeuroNode® sensor, and an Apple® iPad, this device lets the user operate their speech generating software using iOS®.
